Inkland Celebrate "Silver 25th"

North-East's Inkland notched up its 25th Violet CtP installation this month reinforcing Inkland's Commitment to Visible Light technology.

"We've stuck by our guns where Visible Light is concerned and have a tremendous amount of experience with the products" explained MD Steve Wilson. "We are now replacing original Visible Light units with Visible Light, if it isn't broke don't fix it just make it

faster! This reflects the confidence our customers have with the quality and reliability of the product and our technical support and back-up.

Whilst other vendors have been arguing

over the Thermal-Visible Light debate, we've just been getting on with it". Inkland have recently been awarded technical

accreditation from Highwater to install and service it's Python Platesetters.

"It is very important to support the Manufacturers in supporting our Customers. We work with our suppliers to ensure customer satisfaction".

Inkland are also involved with Fuji's non bake Visible Light Products for UV Packaging Applications. "The Technology is exciting and we're looking forward to seeing what's round the corner." enthuses Wilson.

Steve Wilson MD

Highwater Support

Inkland have been a Highwater dealer for 5 years. During that time we have installed

15 Highwater CtP systems and numerous Rips. We have recently been awarded technical accreditation from Highwater to install and service its Python Platesetters.

Paul Whelahan, UK Sales Manager for Highwater, says "Our customers realise that quality of service is just as important as price. Because of this, more and more CtP

sales are through regional dealers, like Inkland, who can offer an extremely fast and efficient local service, with which some of the larger national suppliers cannot compete.

This level of service coupled with excellent technical backup makes Inkland the ideal representative for highwater products in the North-East".

Win a Mini iPod. . . See Over

Sava Printing Blankets

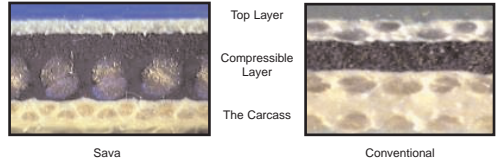

You've heard it all before, lower dot gain, lasts longer, superb smash resistance, more solvent resistant, blah, blah! Well this time it's true.

This revolutionary product does what it says on the tin! A unique radial design gives the blanket immense strength and stability on the press. This, combined with a closed cell microsphere compressible layer gives the blanket superb smash and edge marking resistance.

"We have had 100% success rate so far" comments Press-Room Technical Rep.

Gordon Roberts.

"It's not very often you get a product that produces such positive feedback. Once it's on one press I get the phone call to convert the rest!" says Roberts.

For a press trial phone Gordon Roberts on 07702890091 or the Sales Office on 01325 312212.

Win a Mini iPod

You can win one of today's must have accessories.

Simply unscramble the anagram below describing a common blanket problem and return this mailer to inkland. First correct answer out of the hat will win a Mini iPod.

Draw to take place 1st April. So don't be a fool and have a go!

Inkland have recently acquired an agency for the Arrowstar range of inks from manufacturer Flint-Schmidt.

The Arrowstar range complements our existing Sun and ANI products.

During March, any customer ordering a trial Process Set and a mix of 10 Pantones will receive another FREE OF CHARGE

XEROX

Phaser 7300 LED Colour Laser Printer

The Phaser 7300 prints out colour at 30 pages per minute (ppm) with a first-page-out time of only 16 seconds.

Black-and-white documents print at 37 ppm with only a 13 second first-page-out time.

At 2400 dot-per-inch (dpi) resolution, the Phaser 7300 prints sharper text and finer lines-ideal for colour drawings, flow charts, schedules, spreadsheets, and marketing materials.

The auto-thickness sensor adjusts the fuser temperature to the paper type so you get a consistent look whether you're printing on recycled paper, or bond stock.

The Phaser 7300 uses a 500 MHz processor, which means

many employees can use the same printer efficiently.

Add the hard disk

to store up to 100 saved

jobs you can reprint from the printer's

front panel.

Print on a wide range of paper sizes, including custom paper up to 328 x 914 mm (banner size). The Phaser 7300 offers tabloid colour printing at a very affordable price.

Reduce your costs even more by printing in-house memos and drafts in draft mode or by using the two-sided printing option.

Bonus! Toners for the 7300 have higher capacity than many print cartridges, so you don't need to replace them as often, which saves you time and money.

Epson Stylus PRO 7600

Redefining high quality large format digital colour printing

The Epson STYLUS PRO

7600 features a new advanced Micro Piezo print head technology, 7-colour UltraChrome ink system and high media flexibility. The product capabilities make the STYLUS PRO 7600 the professional printer of choice for 2- and 4-up proofing, professional photography, Giclee or Fine Art prints, high quality POS prints and A1 size 3D-CAD and GIS image printing.

Key Features

• Breathtaking picture quality is

achieved by Epson's industry leading 2880 dpi print resolution and 4pl Ultra Micro Dot

• Life-like skin tones and the finest details with Epson's expanded 7 colour UltraChrome ink set

• Complete control over grey scale gradations and neutral tones with dual black

ink cartridges, three different black ink configurations and unique Grey Balancer software utility

• Maximise output quality by

matching gloss or matte media with new Matte or Photo Black inks. White glove cartridge changing enables you to configure black inks in just 10 minutes

• Printed images with a lightfastness up to 75* years (indoor) with Epson UltraChrome inks

• Comprehensive utility software featuring executable maintenance, diagnostic tools, error-correction and user installable firmware upgrades

• Output edge to edge, borderless prints to a specified range of widely used substrate dimensions

FREE MINI IPOD, 28" WIDESCREEN TV OR WACOM PAD WITH EVERY STYLUS PRO 7600 ORDERED DURING MARCH
